Subject:       **No Further Action Determination** *[Insert specific site releases or areas, as applicable]*

Facility:       *[Facility Name]*  
                  *[Street No., Street Name, City, State, Zip]*  
                  APN No. *[Insert APN No.]*  
                  NDEP Spill/Complaint # *[Insert NDEP #]*  
                  Facility ID: *[Insert Facility ID]*  
                  Petroleum Fund# *[Insert Pet Fund ID]*

Dear *[Insert Responsible Party (RP) Name]*:

The Nevada Division of Environmental Protection (NDEP) has reviewed the *[insert date and title of letter(s)/report(s)]* prepared by *[insert name of CEM]*, CEM of *[insert name of consulting company]* on behalf of *[insert RP name]*. This letter provides a no further action determination for *[insert specific area(s) as applicable]* the *[insert specific site releases or areas, as applicable]* above-referenced facility (Site).

*[If applicable]*

The *[insert date]* *[letter/report]* contains a request for a no further action determination from the NDEP.

The NDEP has reviewed information contained in the *[Corrective Action or Leaking Underground Storage Tank (LUST)]* file that has been provided by *[insert owner/operator name]* and *[insert name of CEM]*, CEM. Based on this review, *[Insert Option 1 or 2 below]*

*[Option 1]*

no contaminants remain in soil or groundwater above action levels or remediation standards; therefore, the NDEP has determined that no further assessment or remediation is required to be protective of human health and the environment (*Insert applicable NAC reference*).

*[Option 2]*

*[list contaminants]* remain(s) above action levels or remediation standards in soil and *[list contaminants]* remain(s) above action levels in groundwater. However, based on current land and groundwater uses, NDEP has determined that no further assessment or remediation is required to be protective of human health and the environment (*Insert applicable NAC reference*).

NDEP may re-evaluate this decision if conditions at the site change or if new or previously unidentified information becomes available that: 1) alters the results of the site evaluation; and 2) demonstrates a potential detrimental impact on human health or the environment.

*[For sites that have monitoring wells and potentially discharge permits]*

Please note that Nevada Division of Water Resources (NDWR) requires abandonment of monitoring wells. Additionally, the NDEP requires abandonment of injection and monitoring wells listed in Underground Injection Control permits at the conclusion of the project. Please make arrangements to properly plug and abandon all site related monitoring wells per NDWR regulation (NAC 534).

Certificates of abandonment should be provided to the NDWR and NDEP, as required. All applicable permits issued to the facility owner, operator, or CEM should be canceled with each permit's respective appointing authority.

If you have any questions or concerns regarding this letter, please contact the undersigned at *[insert phone #]* or *[insert e-mail]*.

Sincerely,

*[Case Officer Name*
